- Belgrade, Serbia
- www.nicolacuric.dev
- 15 . September . 1994

## Languages

- English ●●●●○
- Deutsch ●●●○
- Serbisch ●●●●●

## Competencies

### Programming Languages

- PHP
- TypeScript
- Go
- JavaScript

### SQL-Databases

- PostgreSQL
- MySQL
- MariaDB

### NoSQL-Databases

- Elasticsearch
- MongoDB
- Redis

### Frameworks

- Symfony
- MezzioSwoole
- Laminas/Zend
- Echo
- Nuxt3
- Tailwind

### Message Brokers

- RabbitMQ
- Beanstalk

### Working Environments

- Linux
- Docker
- Kubernetes

## Profile

Experienced and dedicated software developer with in-depth knowledge in building modern web applications and microservices. Focused on creating scalable, maintainable, and high-performance solutions using cutting-edge technologies such as **Symfony**, **Vue.js**, **Docker**, and **Kubernetes**. Particularly interested in developing robust backend systems, integrating modern APIs, and automating build and deployment processes.

## Work Experience

### Optima Apps

05.2022 - still

Web Developer

- Worked as a Backend Developer on a Kubernetes-based microservices system for an insurance client (Real Garant GmbH), focusing on system stability, performance, and security.
- Developed and maintained features using clean, well-structured code aligned with SOLID principles.
- Improved the system architecture and internal tools to optimize development workflows.
- Collaborated with DevOps and QA teams in a CI/CD environment to ensure smooth and reliable releases in bi-weekly sprints.
- Additionally worked on other web projects:
- Fitness & Social Media: Developed APIs and backend services for a social fitness platform.
- Booking Systems: Created modules for scheduling, availability, and payment processing.
- Webshop Platform: Contributed to the development of e-commerce functionalities like product catalog management, order processing, and secure payment integration.

### Serbian Air Force

11.2021 - 05.2022

Web Developer

- HR Management Platform: Developed features for employee onboarding, shift planning, and presence tracking.
- Technical Documentation System: Built a centralized solution for managing aircraft maintenance manuals and technical bulletins, implementing document versioning and access controls.

### Serbian Air Force

09.2019 - 11.2021

Projekt Manager

- Responsible for overseeing project execution from planning to delivery.
- Monitored project progress, tracked deadlines, and proactively identified potential delays or risks.
- Ensured transparent communication with third-party contractors regarding project status, timelines, and scope changes.
- Collaborated closely with stakeholders to ensure deliverables aligned with project goals.

## Education

08.2015 - 09.2019

### Bachelor of Science, Mechanical Engineer

Mechanical Engineering Faculty | University of Defance
